

## KODAK NEXPRESS Operator Replaceable Components Program

### What is this program?

Over 20 million tons of electronic waste ends up in landfills each year and is becoming the fastest growing portion of the world's waste. To help alleviate this problem in the graphic arts industry, Kodak's Graphic Communications Group is proud to introduce the Operator Replaceable Components (ORC) Return Program for KODAK NEXPRESS Digital Production Color Presses. This unique program is specially designed to help printers recycle ORCs used with the KODAK NEXPRESS 2100, 2100 plus, 2500 and S3000 presses in an environmentally responsible manner. Customers simply place the used ORCs into the boxes that the new ORCs arrived in and return to Kodak using the free shipping labels provided in the boxes. Kodak will take care of recycling arrangements.

### What are the benefits of participating?

By participating in the KODAK NEXPRESS ORC Return Program, you will be:

- Helping the environment by reducing the amount of waste that goes into landfills.
- Ensuring compliance with environmental regulations for the disposition of equipment components.
