

IBML ImageTrac 3e ImageTrac IV

The Intelligent Choice for High-Speed Document Capture!

When it comes to very high volume scanning, the IBML range of intelligent document scanning solutions, are unmatched for speed, quality and throughput. They use rules-based logic built into the integrated SofTrac software to maximise productivity and transform paper into information as quickly as possible. The range consists of 2 models – the ImageTrac 3 Series and the ImageTrac IV which have over 15 years of experience in high-speed document scanning built in to their design.

Key Features & Benefits

- Scans intermixed documents from business card-size to A3 ranging from onion skin to thick card, virtually regardless of condition to eliminate re-scans.
- 500-document feeder capacity featuring double-detection technology
- Hand-feed station for inputting exception documents without significantly affecting overall throughput.
- Ergonomic design helps to speed-up jam-clearing and minimise downtime
- Touchscreen* gives the operator full control, simplifies job set-up and the overall scanning process.
- Multiple image output formats including TIFF and JPEG
- A range of options including barcode reader, patch-code reader, MICR, pre and post-image inkjet printer
- Up to 4 sorter pockets available depending on model.

KODAK Professional Services

Kodak offers consultancy services for a wide range of specialisms depending upon your business needs. This ensures the smooth implementation of an IBML system and will include one or more of the following:

- Statement Of Delivery – Kodak specialists will evaluate your capture requirements and workflow to ensure the system-design is tailored to your requirements.
- Project Management – Depending upon the organisation, implementation can be resource-intensive. Kodak will provide end-to-end Project Management services to facilitate this.
- Software Configuration – Kodak specialists will develop hardware parameters for all job-types to be run, job parameter files and build the job-rules into the integrated SofTrac software.
- Software Integration – To ensure the scanning element is fully integrated with your existing on-site IT infrastructure Kodak can provide either a total solution for you, or work with your IT Department to ensure they are self-sufficient to manage their own integration.
- Training – On-site training for key operators on all aspects of the scanning sub-system is available from initial installation through to live processing.
