- * Limitations of the DEMO Version
- * Using Windows Restricted User Accounts
- * Capture Pro on the Internet

What's New in Version 2.0.0

- * Database Lookup. Populate and Validate index fields using data from your database
- * Rescan and Rotate images while scanner is enabled to improve productivity
- * SharePoint output can now do index field mapping and no longer requires a Capture Pro software component to be installed on the SharePoint server
- * Printable User's Guide is now available on the DVD and the Capture Pro web site
- * Automatically import images from specified folder locations
< TIFF, JPG, BMP, PNG, GIF, MODCA, CMP & IOCA >

Supported operating systems

This version has been certified for the following Windows operating systems:

- * XP Professional (x32) - SP2 and SP3
- * XP Professional (x64) - SP2
- * Vista (x32) - original and SP1
- * Vista (x64) - original

Local language support

KODAK Capture Pro Software is available in the following languages:

- * Brazilian Portuguese
- * Czech
- * Chinese (Simplified)
- * Chinese (Traditional)
- * Dutch
- * English
- * French

- * German
- * Italian
- * Japanese
- * Korean
- * Russian
- * Spanish
- * Swedish
- * Turkish

Installation Guidelines and Prerequisites

- * KODAK Capture Pro Software must be installed by a System Administrator.
- * KODAK Capture Pro Software requires a successful installation of the latest version of the scanner's TWAIN data source in order to run the scanner.

The TWAIN data source (or driver) is installed when the Scanner Validation Tool (SVT) is installed. The latest version of the TWAIN driver and SVT for the scanner must be downloaded separately at the following web site link:

www.kodak.com/go/di support

- * The minimum required PC is a 2.8 GHz processor with at least 1 GB of memory. It is recommended to have at least 2 GB of memory. If you are producing Searchable PDF output on the same PC while scanning into new batches, then it is recommended that your PC has a dual-core processor.
- * Operators of KODAK Capture Pro Software must have full read and Write access to the Multi-User Folder Location (by default C:\Documents and Settings\All Users\Shared Documents\KCS Pro) specified during the installation of Capture Pro Software.

Known Issues and Limitations

- * Uninstall will not completely remove the Kodak\Capture Pro path in the Program Files directory.
In addition, the Uninstall will not remove the Job Setups, Page Setups, etc... from the Multi-User Path directory (by default C:\Documents and Settings\All Users\Shared Documents\KCS Pro). To do a complete uninstall so that all files are removed from an installation, you must manually delete the KODAK Capture Pro Program Files (by default C:\Program Files\Kodak\Capture Pro) and Multi-User Path directories.
- * The Kodak Capture Pro Software End User License Utility (EULU) will not recognize hardware keys when using WIBU version 3.0, which may have been installed with KODAK Capture Software v6.x or earlier. Make sure to install the latest WIBU drivers from the KODAK Capture Pro Software DVD located in \Utilities\WIBU. NOTE: This should only be necessary when running the EULU on a PC where KODAK Capture Pro has NOT been installed since these latest drivers are installed automatically during installation.
- * Some TWAIN drivers do not accept UNC path formats (\\servername).
(I.E. workgroup = \\192.168.250.193\KCS Pro or workgroup = \\dg-us1-test\KCS

Pro)

Users will have to map the drive, to a local disk name, such as: workgroup = Z:\

* To assign the scanner buttons (for those KODAK Scanners that have assignable buttons, e.g., i1220, i1320) while running under Vista, you must run KODAK Capture Pro Software as administrator (right click on the Capture Pro icon, select "run as administrator").

* Some documents on the DVD are stored in PDF format. To view these documents, you must have a PDF reader. A free PDF reader may be obtained by visiting <http://www.adobe.com/>

Limitations of the DEMO Version

A DEMO version of Capture Pro Software can be downloaded from the web at:

www.kodak.com/go/kcsdownloads

The DEMO version has the following limitations:

- * **HARDWARE KEY:** no hardware key ("dongle") is required to run the Demo version.
- * **STAMPING 25% OF THE IMAGES WITH THE "DEMO" BITMAP:** 25% of the images are stamped with the word 'Demo' (added as a bitmap to your images).
- * 100% of all images will be stamped with a "DEMO" bitmap when batches are output.
- * Changes to index data fields are not saved when manually editing index data in Indexing Mode after the 10th document of a batch.
- * A maximum of 1000 documents total can be indexed in any one demo version installation.

Using Windows Restricted User Accounts

For KODAK Capture Pro Software to work properly, the Windows user account must have full control to the following folders and their contents:

C:\ScanPro
C:\BatchesPro
C:\Program Files\Kodak\Capture Pro\System
C:\Program Files\Kodak\Capture Pro\Plugins\Shared Files\AMP
<multi-user workgroup>\KCS Pro
C:\Program Files\Kodak\Capture Pro\Plugins\Shared Files\Nuance
For W2K and XP:
C:\Documents and Settings\All Users\Shared Documents\KCS Pro*. *
For Vista:
C:\Users\Public\Public Documents\KCS Pro*. *

NOTE: The directory names shown above are the installation defaults. The actual directory names used may be different.
